Press Release

DIGITAL COGNATE WIN RUNNERS UP IN
TECH TRAILBLAZERS AWARDS 2022

London, 5th December 2022: **Digital Cognate has been awarded first place runners up in the blockchain category of the Tech TrailBlazers Awards 2022. Tech Trailblazers are an independent technology awards organisation, with global reach and recognition. Submissions for this year's awards exceeded previous totals and were received from across all corners of the world, with a panel of expert judges shortlisting winners before finalists went head-to-head in a public vote.**

The Tech Trailblazers Awards are designed explicitly for smaller new businesses and start-ups, to recognise innovation and development across a whole host of sectors. The winners of the blockchain category, only narrowly beating Digital Cognate were Obital, an organisation focusing on traditional finance and crypto solutions.

Paul McCarthy, Digital Cognate CEO comments;" Back in October, we were delighted to be shortlisted as finalists in the Technology Trailblazers Awards 2022 under the Blockchain Trailblazer category. The winners were announced on 1stDecember and while we did not take home the award this time, we are thrilled to be first place runners up!"

"Our solution is a cloud-based alternative to a traditional distributed blockchain, that ensures maximum security, privacy, and control for complex, classified, regulatory or sensitive processes and transactions. Simply being selected as finalists really is a great achievement for Digital Cognate and a tremendous boost for us all in what has already been an exciting and busy year!" He continues.

"Being the first runners up, at such an early stage in our corporate maturity, recognises and reinforces something we have known all along; that we have something really rather quite special here."

Paul finishes by saying; "I would like to give my personal thanks to everyone involved in getting us to this point! I have no doubt this is the first of many and that there will be more awards to come in the future!

Ends.
